Date: From 09/01/2026 to 15/01/2026

| Progress Planned                                        | Progress Achieved                                           |
|---------------------------------------------------------|-------------------------------------------------------------|
| Researching current rural education challenges.         | Conducted brainstorming sessions to define project 'UDAAN'. |
| Identifying target demographics for 'UDAAN'.            | Researched rural student challenges in career selection.    |
| Surveying local career counseling methods.              | Drafted the primary mission and vision statement.           |
| Analyzing gaps in existing career guidance systems.     | Identified target age groups and educational backgrounds.   |
| Defining project objectives and core problem statement. | Created a stakeholder map for rural education guidance.     |
| Drafting requirement gathering documentation.           | Documented high-level requirements for the platform.        |
| Reviewing objectives with stakeholders.                 | Finalized the core objective document.                      |
|                                                         |                                                             |
|                                                         |                                                             |

Guides Review: Objectives of project were finalized

Date: From 16/01/2026 to 22/01/2026

| Progress Planned                                         | Progress Achieved                                                   |
|----------------------------------------------------------|---------------------------------------------------------------------|
| Reviewing research papers on psychometric analysis.      | Researched various backend frameworks suitable for ML integration.  |
| Comparing different web frameworks (Django vs Flask).    | Evaluated Flask for its lightweight nature and scalability.         |
| Evaluating MySQL vs NoSQL for project needs.             | Conducted a feasibility study for MySQL database.                   |
| Studying AI/ML library documentation for career mapping. | Researched AI/ML libraries for psychometric pattern matching.       |
| Finalizing the 'UDAAN' tech stack.                       | Finalized the technical stack (Python, Flask, MySQL, Scikit-Learn). |
| Documenting technology selection rationale.              | Documented the tech-stack rationale for the project report.         |
|                                                          |                                                                     |
|                                                          |                                                                     |
|                                                          |                                                                     |

Guides Review: Worked on the finalization of technical stack.

| Progress Planned                                     | Progress Achieved                                         |
|------------------------------------------------------|-----------------------------------------------------------|
| Mapping career streams to educational pathways.      | Compiled a database of local career opportunities.        |
| Developing dynamic roadmap generation logic.         | Developed the logic to link test results to career paths. |
| Integrating local career opportunity data.           | Coded the dynamic roadmap generator module.               |
| Formatting the roadmap for easy readability.         | Formatted the roadmap as a visual step-by-step guide.     |
| Linking test scores to specific roadmap suggestions. | Included educational requirements for each career path.   |
| Testing the generator with various score profiles.   | Added links to relevant local courses or scholarships.    |
| Polishing the roadmap visual presentation.           | Tested roadmap accuracy with different score profiles.    |
|                                                      |                                                           |
|                                                      |                                                           |

Guides Review: worked on dynamic roadmap generator module & its accuracy

| Progress Planned                                | Progress Achieved                                       |
|-------------------------------------------------|---------------------------------------------------------|
| Defining unit test cases for core modules.      | Wrote unit tests for the database connection modules.   |
| Performing database connection stress tests.    | Conducted edge-case testing for the scoring logic.      |
| Testing scoring logic against edge cases.       | Performed integration testing between UI and Backend.   |
| Checking for security vulnerabilities in login. | Identified and logged functional bugs.                  |
| Identifying and logging bugs in the UI.         | Fixed bugs related to session management.               |
| Resolving high-priority bugs discovered.        | Validated form input sanitization for security.         |
| Ensuring system stability across modules.       | Performed a final end-to-end walkthrough of the system. |
|                                                 |                                                         |
|                                                 |                                                         |
